Ce dépôt concerne les rendus de [Jonh Doe](#).

TP1

Exemple de code

```
---  
    private IsItFriday isItFriday;
```

```
@Given("an example scenario")  
public void anExampleScenario() {  
}
```

```
@When("all step definitions are implemented")  
public void allStepDefinitionsAreImplemented() {  
}
```

```
@Then("the scenario passes")  
public void theScenarioPasses() {  
}
```

```
@Given("today is {string}")  
public void todayIsDay(String day) {  
    isItFriday = new IsItFriday(day);  
}
```

```
@When("I ask whether it's Friday yet")  
public void iAskWhetherItSFridayYet() {  
    isItFriday.checkIfIsItFriday();  
}
```

```
@Then("I should be told {string}")  
public void iShouldBeTold(String string) {  
    Assertions.assertEquals(string, isItFriday.getIsItFriday());  
}  
---
```
